E. SESSION SUMMARY

SG1A

The target vessel known as the [redacted] is off the coast of a beach or sandy area with rocks. Foreign black haired men with dark eyes are somehow associated with this vessel. The people native to the area where the vessel is located are like savages. The vessel has explosives aboard and a long thin golden line emanating from the vessel indicates radar capabilities. These explosives can cause considerable damage to areas including fire on impact. Intelligence related activities may be monitored from the air.

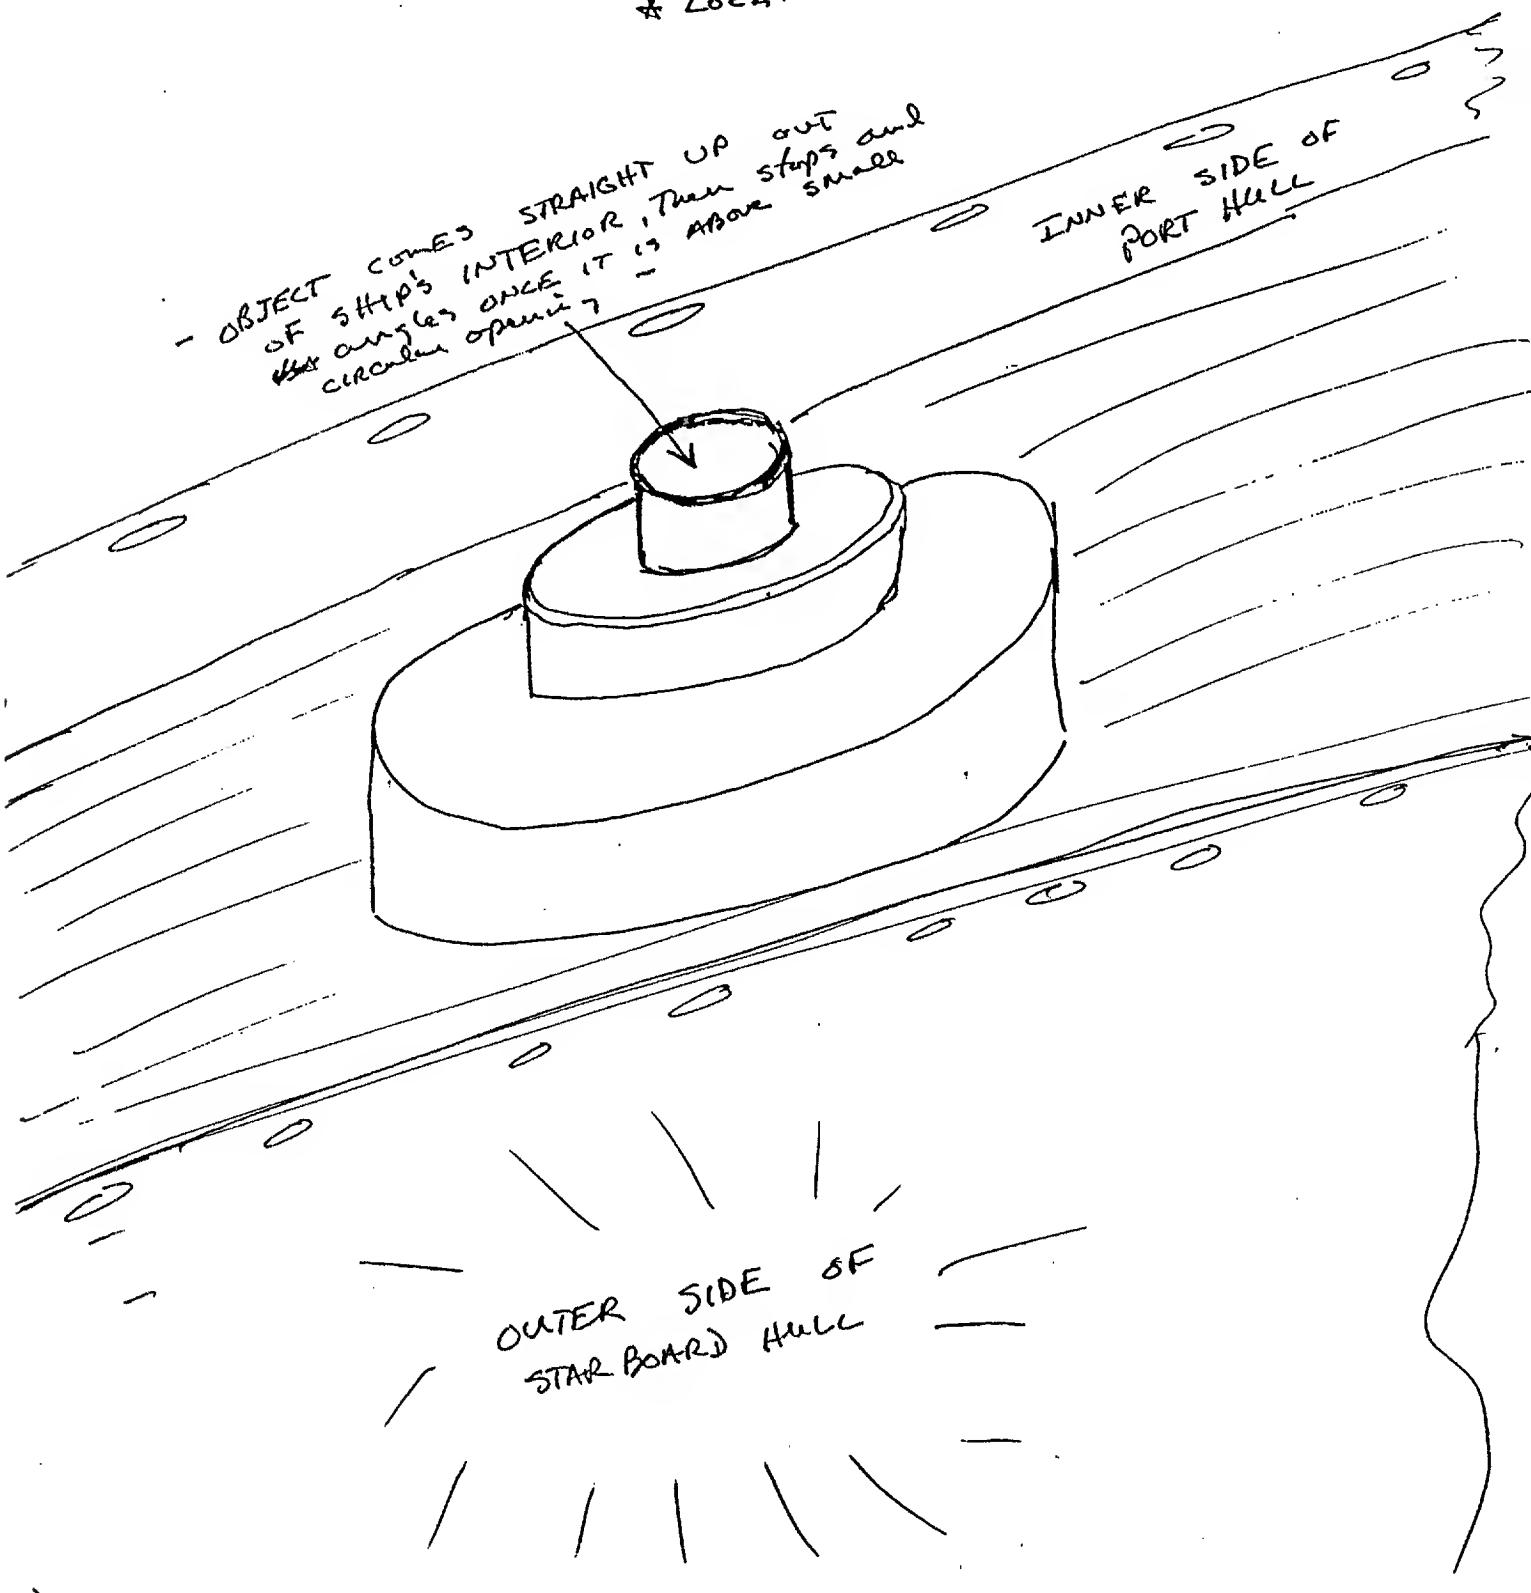

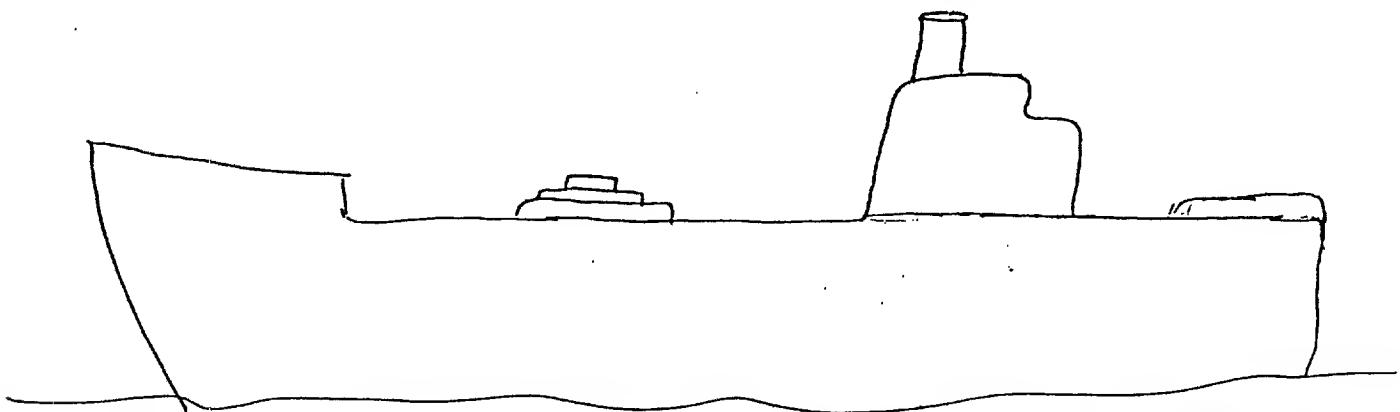

* Located mid-ship

- OBJECT COMES STRAIGHT UP
OF SHIP'S INTERIOR
** angles once it is above small
circular opening

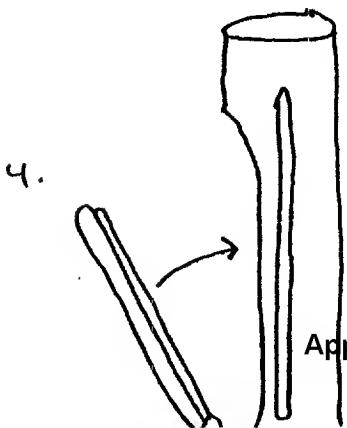

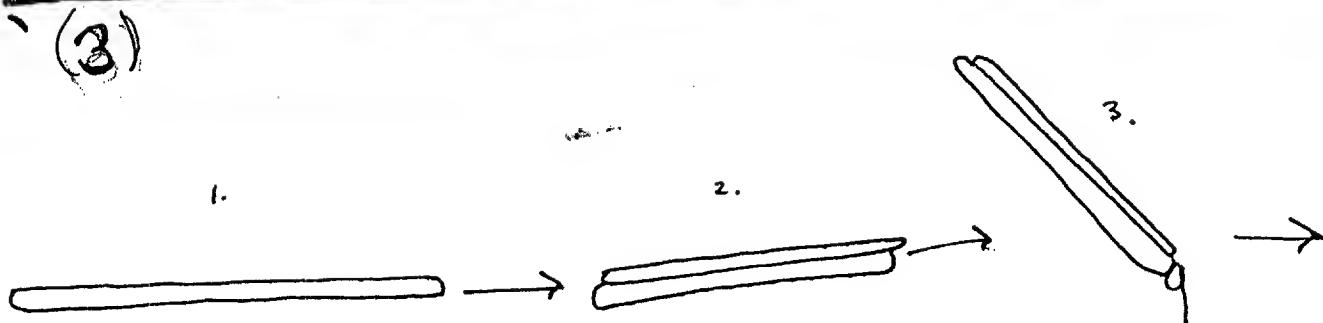

INNER SIDE OF
PORT HULL

OUTER SIDE OF
STARBOARD HULL

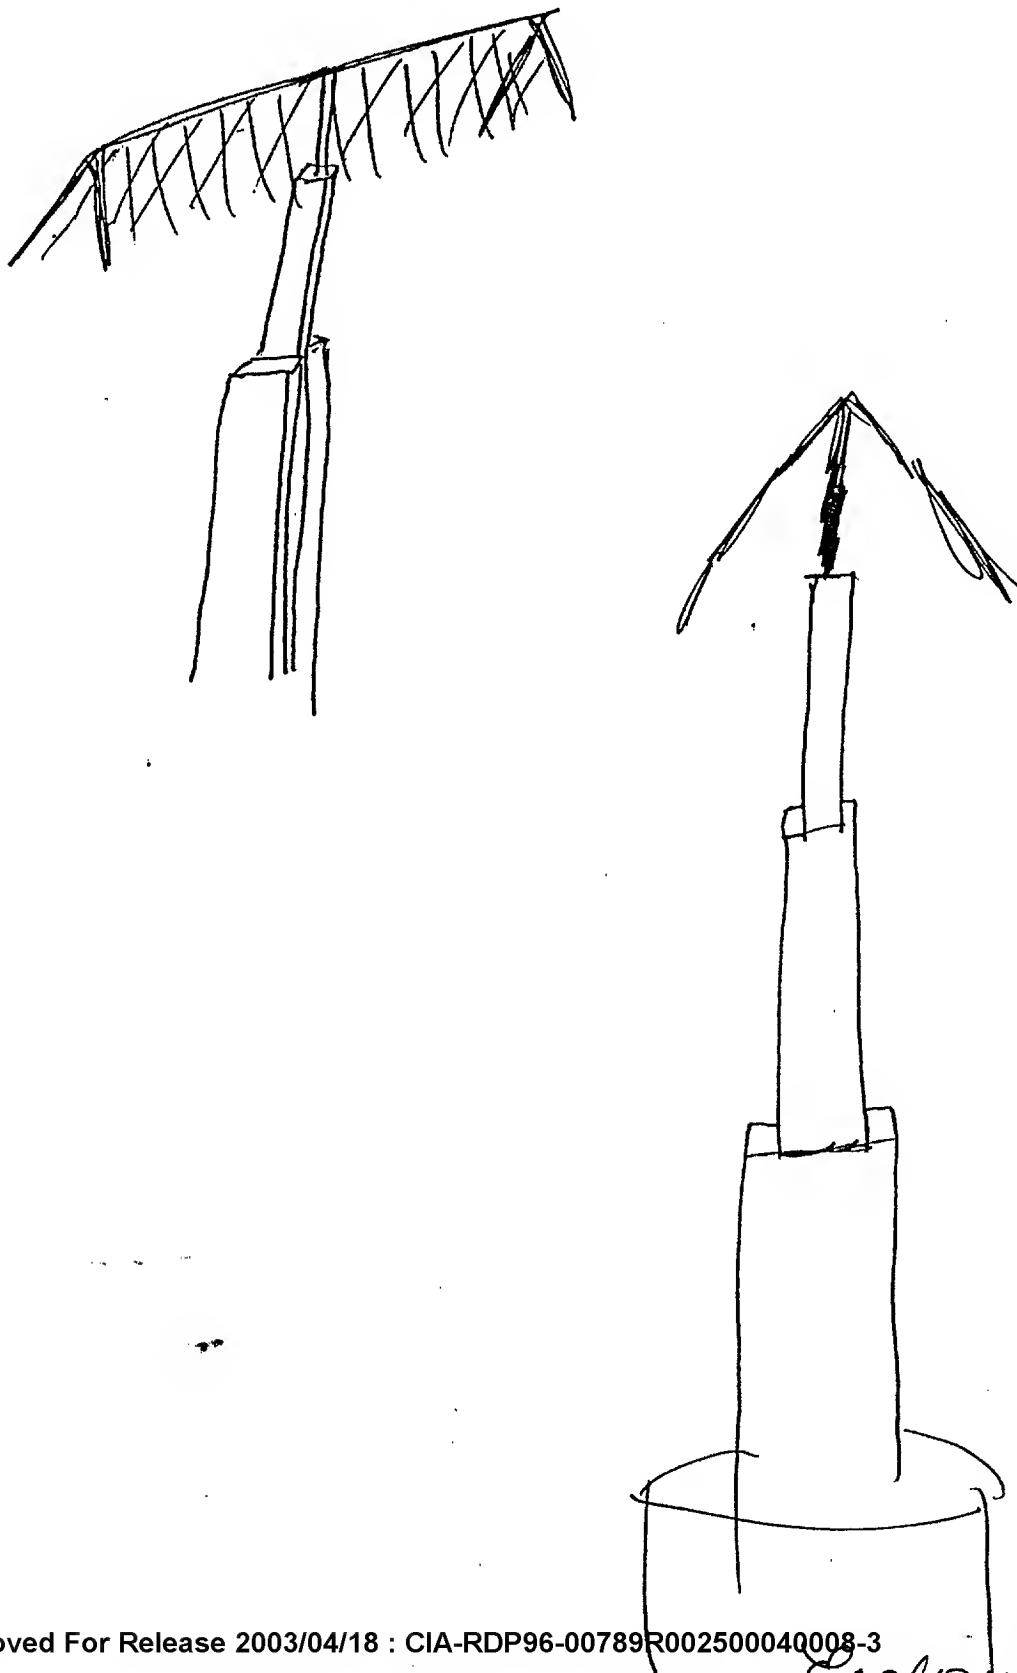

Long tubes, stacked in groups of 3; top tube appears larger diameter than lower tubes.

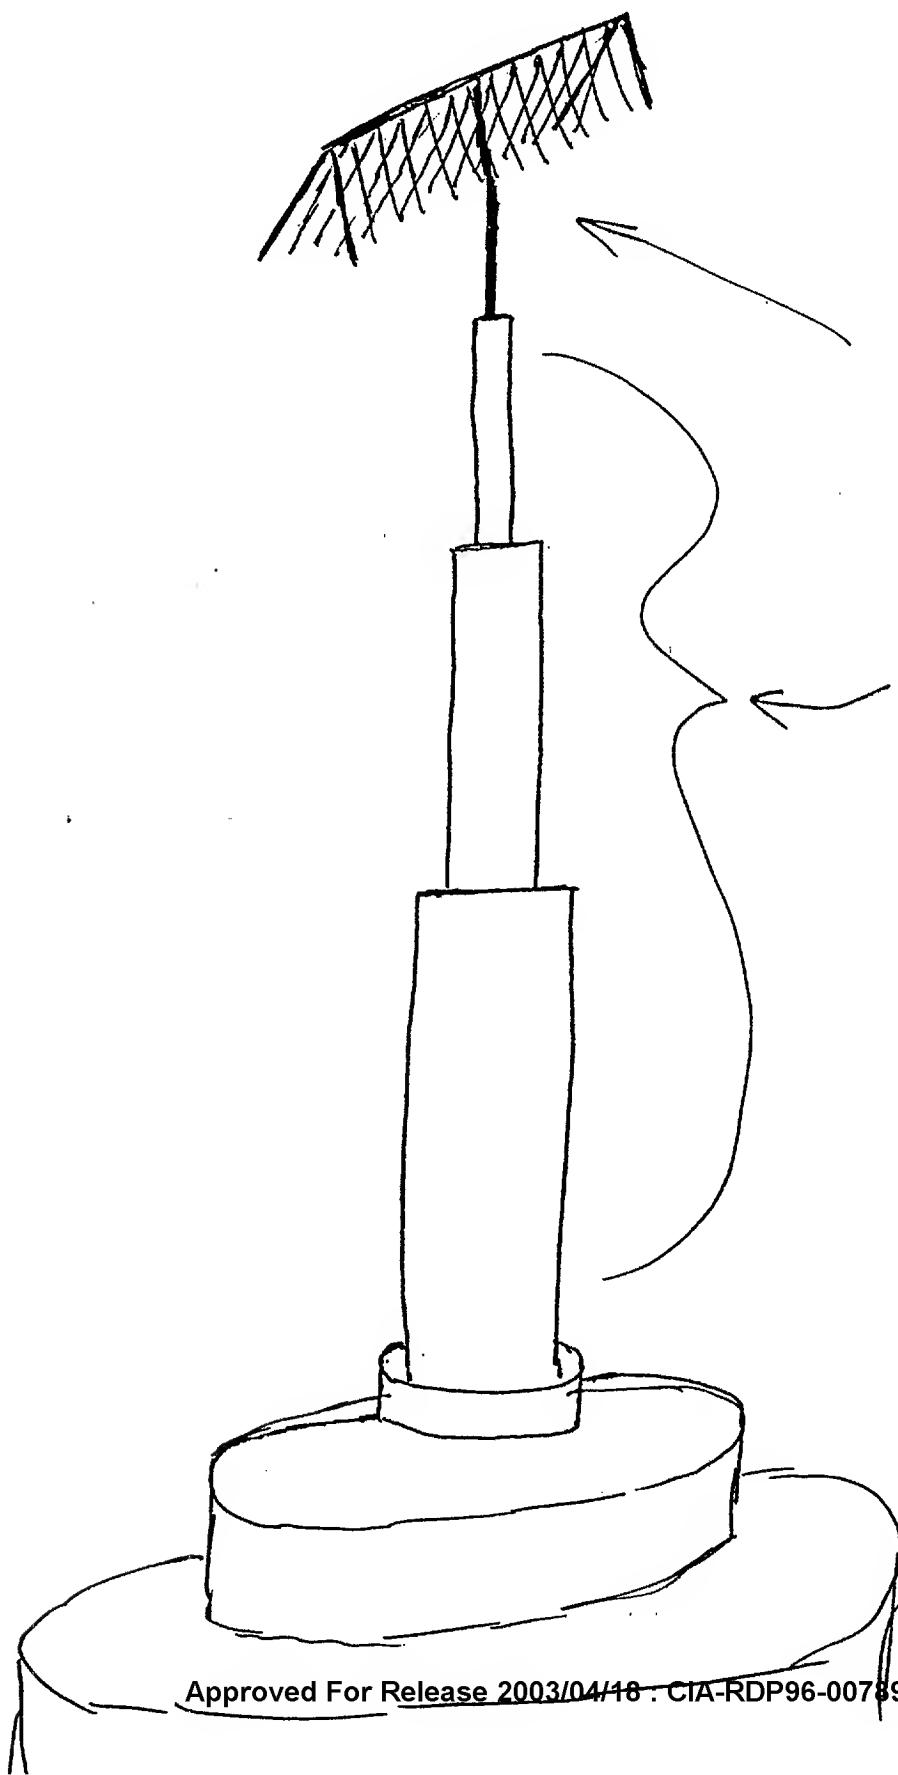

* Tubes / cylinders are moved from a horizontal to vertical orientation; then lifted up inside of a larger tube.

Enclosure 1/d
1 incl 1

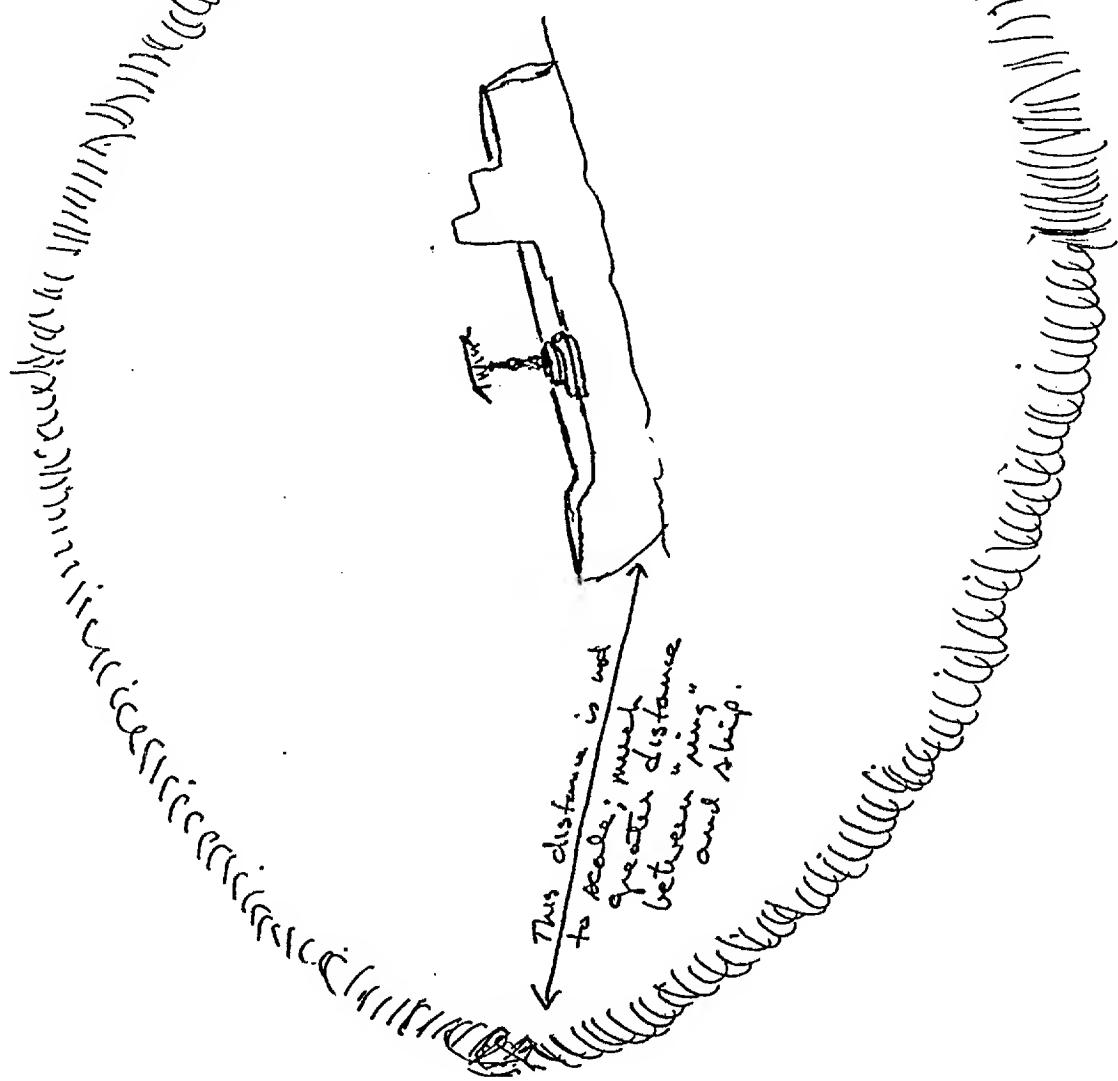

Telescopes up, then
spreads out.

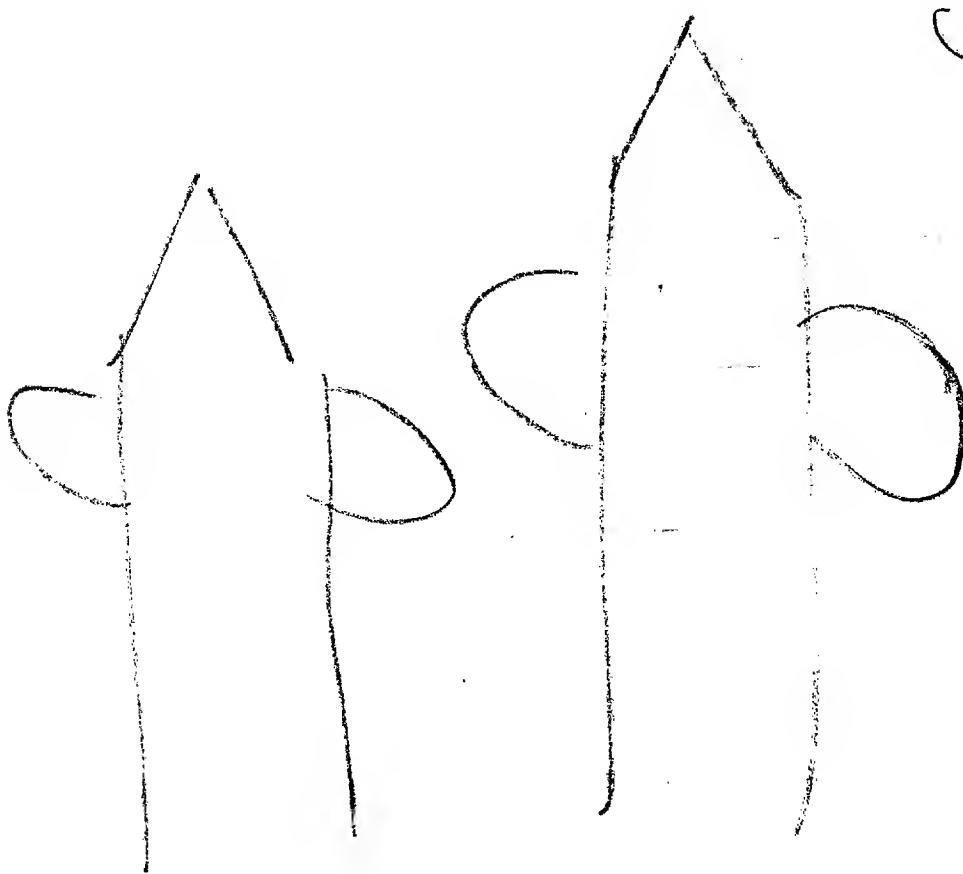

PROPORTION OF upper
Object to telescopic
feature is not to scale:
upper object is larger
is longer (at least as
wide as the vessel) is
the telescopic feature
is much thinner in
comparison.

Some sort of "run" is
around the west end.
Distance is in tens of
miles, maybe hundreds
(60 ± 100 are important
#s).

Time: 1st Session	:	1307-1435
2nd Session	:	1215-1415
Method Used	:	CRV
Aids/Distractions (PIs)	:	Post-migraine/sinus flair up
Pre-session Hunches (AVs)	:	Cargo type vessel
Date Summary Returned	:	26 OCT 93

D. EVALUATION DATA:

Viewer's Estimate	:
Evaluator's Estimate	:

E. SESSION SUMMARY:

SG1A

The target vessel [redacted] is located off of the east coast of a land mass within the band between the equator and the Tropic of Capricorn. This vessel is much faster than others of a similar type. There is a feeling of a "military" configuration within the vessel although its exterior has the appearance of a commercial cargo vessel. If, in fact, [redacted] is the true name of this vessel, its A.K.A. name includes the letters "...ANTA" and "MY.....". The bow of this vessel angles up more than is normal for a similar ship.

SG1A

There is a very unfamiliar circular or ovoid structure situated mid deck on this vessel (see diagrams on pages 2b, 3, 4a and 7). It has three levels exposed above the deck and a hollow tube which penetrates down into the interior of the vessel. An object is lifted straight up and out of the vessel's interior; then, it stops and changes angle once it is above the smallest opening (see diagram on page 3).

This structure is associated with directed energetics of some sort. Large, circular fields or rings of energy are projected out at an extremely fast rate from the smallest opening. They are reminiscent of "visible light" rings of donut-shaped white energy. Pages 5 to 7 depict an angled apparatus which telescopes up out of the interior of the vessel, then spreads out.

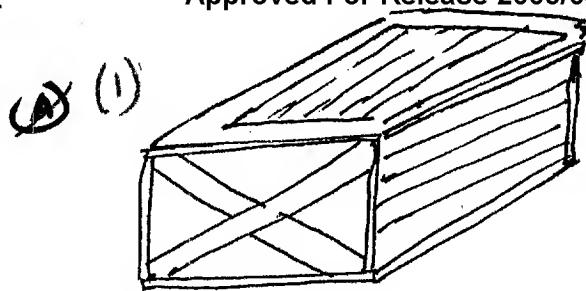

The diagram on page 7 depicts what is formed by the structure

on the vessel. It is some sort of energy "ring" that is formed around the vessel. The radius is in the tens or hundreds of miles range (60 and 100 are important for some reason). This ring, perceptually, forms a white "fog", "noise" or "mist" around the vessel. It creates an inference which blocks something. The energetics feel as if they pulsate back and forth. It creates an interference but also "senses" at the same time.

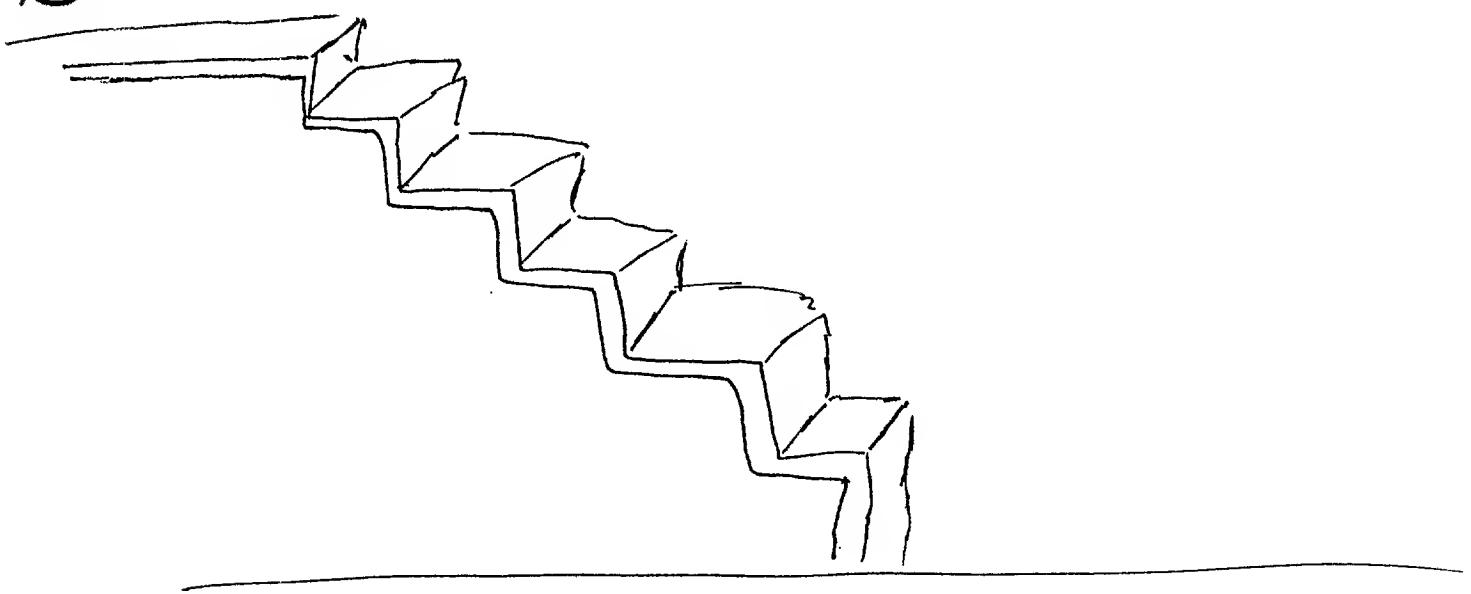

There are a number of long, black tubes or cylinders wrapped in green and stacked width-wise within the hold area. They are stacked in groups of three with the upper tube having a larger diameter than the two lower tubes. These tubes are perceived to be "components" of some kind of "system". These tubes or cylinders are moved from a horizontal orientation to that of a vertical one. Then they are placed within a larger, hollow tube and lifted upwards.

Other concepts associated with the general target but not necessary related to one another are:

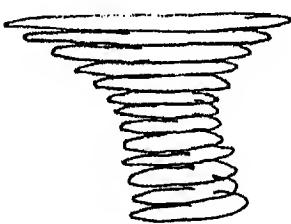

- someone is saying "You're hurting me. You're hurting me".
- the smell of dried fish or squid and "birds singing".
- some sort of relationship to the term "Syrian".
- the smell of oil.
- a spring-like object slowing uncoiling and recoiling.
- a fire.
- a male with long, black hair who occupies an important role in the operation of this vessel.
- a truncated object which "pops up"; this action is reminiscent of a submarine's "con tower" breaking the surface of the water.
- an object with "twin barrels".

Viewer Confidence (H/M/L):
Evaluator's Estimate

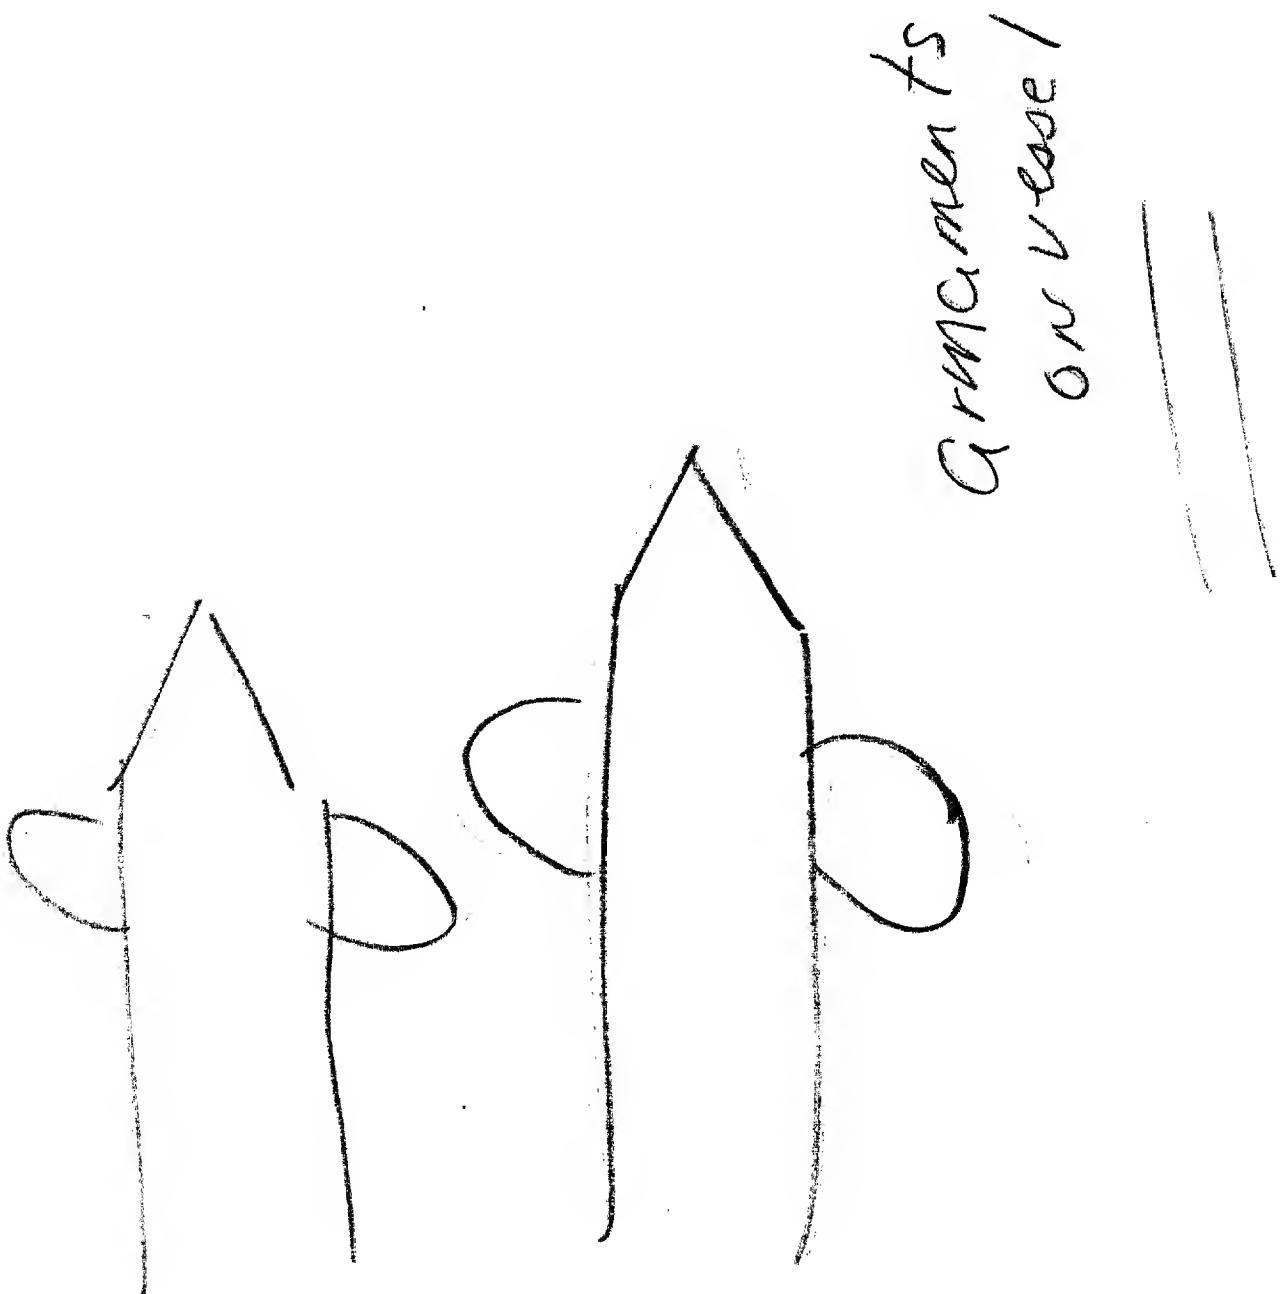

E. INFORMATION:

Vessel has armaments that are on board which are thick and tubular with points at one end. (See sketch) These objects look like small missiles. The armaments are enclosed or encased or secured but can be opened up with an automatic motion. The armaments are lined up one by one, side by side. The armaments seem to be white or silver or shiny in color. The armaments can be considered dangerous and destructive.

It seems that the vessel has a capability to "see" at a very long range. A light can surround a very large area and "see" out at a long distance. It cannot be determined at this time if this capability is with the vessel itself or if it is an independent object or thing (something like radar) that is associated with the

vessel.

In conclusion, I would say that the vessel has powerful armaments to protect itself.
